

This package contains low poly models for Movies, Games, VR, and Meta-verse. You can assemble a cute stage like a Japanese TV show or a live stage.

Features:

- All props are ready to use in Standard pipeline and URP
- This package includes 50 prefabs
- Just drag & drop FBX or prefabs to your scene
- All models composed of 22~3792 tris. Optimized for mobile phone and VR
- All textures are 1024×1024 pxs
- Original colors can be created by changing the main color of the material
- Can be used without purchasing other bundles
- Real-world scale
- No self made custom shaders

Please see preview images and package content to learn more before purchasing.
